About Caleb

Mechanical engineering support and preparation

Caleb Rife helps prepare and prosecute domestic and international patent applications. His core technical experience is in the field of mechanical engineering.

Previously, Caleb worked as a mechanical intern modeling HVAC, plumbing and electrical construction documents for industrial, commercial and residential buildings. He also worked with other architects and structural engineers to determine proper positioning and code-required space allotted for mechanical units. At a separate internship, he analyzed industrial processes to identify problematic areas between mechanics and automation.

Capabilities

Intellectual Property

Patent

Patent - Manufacturing

Professional Recognitions

- Order of the Engineer - Link #175

Education and Honors

Milwaukee School of Engineering (B.S., 2023)

- Mechanical Engineering
- Dean's List
