About Chaerim

General patent prosecution and engineer assistance

Chaerim Lee helps intellectual property clients prepare and prosecute domestic and foreign patent applications and patent searches.

Chaerim worked as an intern at a patent law firm drafting patent drawings for clients and communicating with other patent agents to highlight patentable features. Her other experience includes assisting the product manufacturing process of a display folding assembly system and designing quality control fixtures for testing the optical quality and electrical performance of products. In a research lab, she optimized and streamlined a 3D printing process for making assessment tools. Additionally, she has designed and manufactured an off-road camper trailer with a team.
